Learn to code and help nonprofits.

Join a community of
200,000+
developers.

Work on coding
challenges together.

Build a portfolio of
apps that solve real
problems.

Empower
nonprofits with
code.

Free Code Camp is a non-profit organization with some of the most useful content and beneficial resources for programmers and developers. It provides enormous quality posts, guides, and material for beginner programming enthusiasts to practice and master their coding skills.

W3Schools.com

W3Schools is a training website for learning web technologies online. Content includes tutorials and references relating to HTML, CSS, JavaScript, JSON, PHP, Python, AngularJS, React.js, SQL, Bootstrap, Sass, Node.js, jQuery, XQuery, AJAX, XML, Raspberry Pi, C++, C# and Java.

HackerEarth.com

Hackerearth

Be A Better Programmer

 hackerearth

Similar to HackerRank, HackerEarth provides a platform for both developers and companies. While programmers can choose to practice, learn, and develop a variety of projects while partaking in numerous competitions and challenges, the companies usually utilize this website for technical skill assessment and remote video interviewing.

A more interesting way to learn programming

Projects

Discussion

Solutions

DevProjects is a free community where people can learn programming by working on curated projects. Each project is specifically designed by senior developers and mentors to bridge the learning gap between theory and real-world code. Users can discuss project details with peers and mentors and share their code to receive feedback.

Codecademy.com

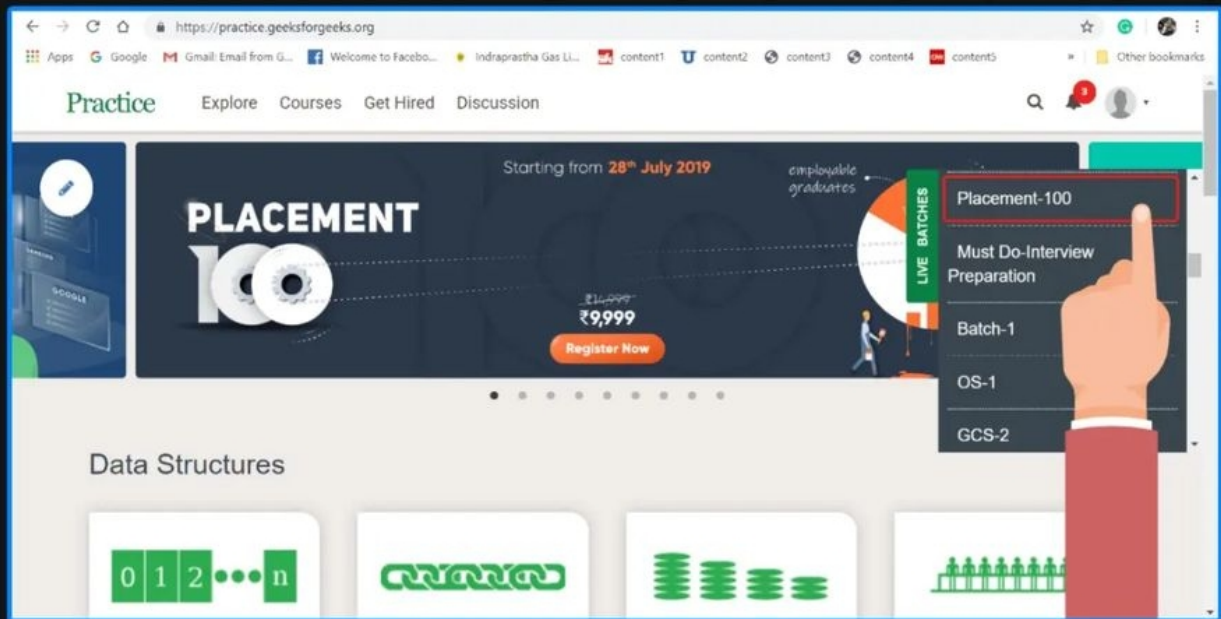

codecademy

Codecademy is a brilliant place for beginner developers and programming enthusiasts to invest their time and effort to enhance their coding skills. Codecademy offers free interactive sessions online in 12 different programming languages, including Python, Java, Go, JavaScript, Ruby, SQL, C++, C#, Swift, and Sass, as well as markup languages HTML and CSS.

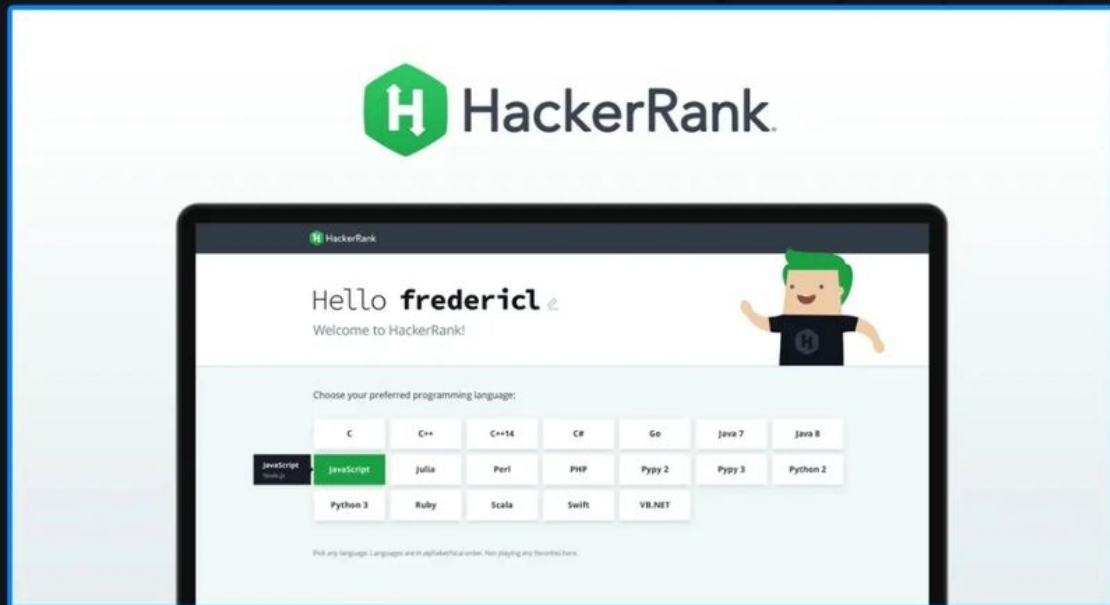

GeeksforGeeks.org

Geek For Geeks is one of my favorite platforms for free content on learning more about numerous programming languages and other coding-related topics. It contains well-written, well thought and well-explained computer science and programming articles, quizzes, and so much more to enable user to gain further experience and enhance their coding skills.

HackerRank.com

HackerRank is one of the best websites on the internet because it offers a wide variety of resources for beginner developers. It has some quick crash courses, including the 30-day challenge to gain more experience in programming languages.

Glad to see you here

Thanks you
